EDUCATION

Washington State University — Pullman, WA

B.S. Computer Science, Minor in Mathematics

Expected December 2027

GPA: 3.88/4.0 | Dean's List, President's Honor Roll, CS Top Scholar (2025–2026) | \$4,000 EECS General Scholarship Recipient

Relevant Coursework: Data Structures & Algorithms, Software Engineering I, Machine Learning, Data Mining

TECHNICAL SKILLS

Languages: Java (Advanced), Python (Advanced), JavaScript, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, REST APIs, scikit-learn, pandas, NumPy

Databases & Cloud: PostgreSQL, MySQL, AWS, Microsoft Azure

Tools: Git, GitHub, Docker, Postman, PowerShell, Microsoft Intune, Render

PROJECTS

Online Adapting Guesser

Jun – Aug 2025

Full-Stack Web App — Java, Spring Boot, PostgreSQL, Docker, Postman

- Architected a 3-layer Spring Boot REST API over PostgreSQL to persist a single shared decision tree across sessions, containerized the service in Docker, and validated save/load endpoints in Postman.
- Re-engineered a recursive binary-tree traversal from a prior coursework assignment into an iterative, stateless algorithm, restructuring the tree to expand dynamically per incorrect guess and removing recursion-depth risk under concurrent web requests.

Credit Card Fraud Detection Pipeline

Apr 2026

Data Mining, WSU (Team of 4) — Python, scikit-learn, pandas

- Built an end-to-end fraud detection pipeline on 284,807 transactions with severe class imbalance (492 fraud cases, 0.17%), owning data preprocessing and feature scaling.
- Tuned model selection toward recall given the class imbalance, evaluating with ROC-AUC, confusion matrix, and precision/recall/F1, holding missed-fraud rate under 1% on the held-out set.

Instagram Follower Comparison Extension

Dec 2025

Chrome Extension — JavaScript, HTML/CSS, DOM Scripting

- Built a content-script + popup Chrome extension that scrapes and parses the live Instagram DOM across simulated infinite scroll to compare 2,000+ follower/following usernames.
- Computed the set difference between the two username arrays client-side and rendered results in an interactive popup UI, with no dependency on Instagram's private API.

Grammar Solver

May 2025

Recursive Text Engine — Java

- Designed a recursive Java engine using HashMaps to parse context-free grammars and generate hundreds of unique, grammatically valid sentences, with error handling for malformed grammar input.

PROFESSIONAL EXPERIENCE

Software Operations Intern — SanMar

May – Aug 2026

Issaquah, WA

- Identified 68 groups of unsupported GPO configurations via Intune Group Policy Analytics, scripting the audit process in PowerShell and building a structured migration roadmap toward Microsoft Autopilot.
- Migrated enterprise Group Policies to Microsoft Intune through PowerShell scripting, consolidating firewall rules and reducing redundant policy sprawl by 62%.
- Validated post-migration policy enforcement through systematic endpoint testing, increasing MDM support coverage by 23%.

LEADERSHIP & ACTIVITIES

Scholarship Chair, Executive Council — Sigma Nu Fraternity

Nov 2025 – Present

Pullman, WA

- Raised chapter GPA by 0.5 points across 60+ members by designing and running mandatory study-hour and academic-counseling programs, tracking compliance via Excel/Canvas and reporting metrics to the Interfraternity Council.

Member — LeetCode Club

Washington State University

- Practice algorithmic problem-solving and participate in mock technical interviews with peers, with regular guest sessions from industry software professionals.

CERTIFICATIONS

AWS Cloud Practitioner (Apr 2026) | Microsoft Azure AI Essentials Professional Certificate (Jun 2026) | Microsoft Azure Essentials Professional Certificate (Jul 2026)
